

NEOWARE THIN CLIENTS

Neoware is the fastest growing thin client company and a leader in our industry because of a simple business philosophy:

We use open, industry-standard technologies, we are 100% committed to this market, and we make sure we stay close to our customers delivering customized solutions provided by engineering resources near you. It is the benefits of this philosophy that have motivated the world's most prominent companies to embrace Neoware thin clients.

WHY NEOWARE THIN CLIENTS?

SECURE

Neoware thin clients eliminate most security problems that plague PCs. They run applications as fast as a PC. They are virtually immune from PC viruses, can be completely locked down, have no floppies, CDs or hard disks, and never need backups.

RELIABLE

Neoware thin clients are dramatically more reliable than PCs. There are no moving parts, no floppy drive, and no hard drive. The rugged metal cases are stylish and long lasting. Neoware thin clients just plain work!

AFFORDABLE

Starting at \$199, Neoware thin clients reduce on-going capital expenditures up to 85% when compared to PCs. Neoware thin clients dramatically lower on-going administrative costs, too.

MANAGEABLE

Neoware thin clients offer fast initial deployment and plug-and-play replacement. All devices can be centrally managed without administrators traveling from desk to desk.

OBSOLETE-FREE

Unlike the typical PC, which is designed to last three years, Neoware designs thin clients to last up to ten years. We use open technologies so you can migrate from Linux to Windows CE to Windows XPe to Windows XP Pro without changing hardware. Customers can upgrade to get the latest features for less than one-tenth the cost of a new appliance. Neoware appliances sold to customers in 1991 are still upgradeable to current operating systems and are still managed by Neoware's ezRemote Manager. Talk about investment protection!

NEOWARE OFFERS

CAPIO ONE

Neoware's Capio One, the Fast, Easy, and Affordable thin client appliance offers the broadest range of models, with prices beginning at only \$199.

NEOWARE e100

Neoware e100 offers the performance and video quality of today's most powerful PCs in a secure, managed thin client appliance.

The Neoware e100 is also available in a flashless configuration to be used with Neoware Image Manager software. This innovative software enables you to access all of your applications and OSs on-demand from a virtual disk drive on the server - removing the application size limits previously imposed by flash. Definitely saving you money and improving productivity.

NEOWARE e350

The Neoware e350 offers the security, manageability and reliability benefits of a thin client appliance packaged in a sleek, stylish flat panel monitor for space-saving installations.

WHO CHOOSES NEOWARE THIN CLIENTS?

Neoware supports millions of users at thousands of companies, including global leaders in retail, healthcare, hospitality, transportation, finance, manufacturing, government and educational institutions. Practically any organization that needs better control of its information technology at a lower cost will benefit from a Neoware solution.
